

## PALM ISLAND CONSTRUCTION, INC

May 22, 2011

To whom it may concern.

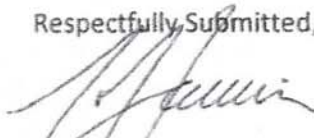

Our company has been in the factory-built construction and development business for several years and have shared in many projects with ON THE LEVEL General Contractors Inc from San Diego to Mammoth Mountain. From small single-unit one and two story projects to major multi-unit multi-stacked condo resort projects ON THE LEVEL has consistently and successfully performed above and beyond that which they contracted for .

We have found their overall construction and technical knowledge and ability to their hands on day to day in-the-trenches trade skill and jobsite performance exemplary to say the least. They have always showed up on time, worked within the budgetary guidelines they've contracted for and completed their project deadlines well within the required time frame.

I have known John Arendsen, founder and CEO of ON THE LEVEL, personally for many years and have grown to respect him as a true professional and personal friend. After the series of hurricanes hit the Florida coast in 2004 he took it upon himself to obtain his Florida manufactured home contractor's license in record time whereupon he mobilized his crews, transportation equipment, materials, supplies and tools and traveled from coast to coast in less than 30 days in order to set up and assist in the redevelopment of the hundreds of communities that were ravaged by those tragic events.

If and when there were any issues or concerns about the quality of their work product they always got on it immediately and without any excuses or finger-pointing. Their work ethic, honesty and integrity is hard to find in the construction industry today. We will continue to include ON THE LEVEL in any of our forthcoming projects and look forward to participating with them. We wouldn't hesitate to recommend them for any project they felt they were qualified for.

Respectfully Submitted,

John Harriman  
President & CEO
